LEOPARD GECKO CARE

Leopard geckos come from Northwest India, Southwest Afghanistan, Eastern Iran and Pakistan where they live a mostly solitary lifestyle. They can grow up to 25 cm (10 inches) in length and can live for up to 20 years in captivity.

HOUSING

- As large a vivarium as possible should be provided to enable room for exercise and to allow a thermal gradient to be created along the length of the tank (hot to cold). Wooden or fibreglass vivaria are ideal as this provides the lizard with some visual security and ventilation can be provided at lizard level. We recommend a minimum vivarium size of 36x18x18
